

Dermal Fillers

Injecting a medically developed solution under the skin with a fine needle in order to enhance facial features, plump grooves or sunken areas and fill lines. We only use high-quality products and our dermal filler of choice is Juvéderm®.

WHY CHOOSE TO HAVE DERMAL FILLERS?

As we age, our skin starts to lose moisture (hyaluronic acid) and natural levels of collagen and elastin start to decline. Meaning your complexion becomes dry, decreases in volume and lines and wrinkles start to appear. These signs of ageing are most commonly noticed first around the cheeks and chin, as the levels of subcutaneous fat in the face start to reduce and skull bones begin to reabsorb - therefore becoming thinner and meaning that the skin starts to hang and sag.

The shape of the face then changes from the "triangle of youth" to rectangular and heavy shaped and this is where dermal filler plays a huge part in helping to restore lost volume, by boosting levels of hyaluronic acid when injected into the different layers of the dermis. Creating a subtle, smooth and natural result.

Carefully placed dermal fillers replace volume where volume has been lost and areas that can be treated include the cheeks, chin, jawline, under the eyes, nose to mouth lines, mouth to chin and above the lip. A thorough consultation will be carried out by our skin health experts pre procedure and a personal treatment plan made to achieve your end goals.

Treatment Overview

Procedure Time
30-60 Minutes

Discomfort Level
Minimal

Anaesthetic
Tropical Numbing Cream,
filler also contains
Lidocaine.

Recovery Time
1-2 Hours

Final Results
2 Weeks

Duration of Results
6-18 Months, product
dependant

Pricing

Cheeks, Chin & Jaw Prices from
(Price on Consultation)

£300
